-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC §§ 102 and 103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-4, 6, 7, 10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application Publication Number 2004/0102262 (Pai).

Art Unit: 3711

Regarding claims 1-4, 7, 10 and 11, Figures 1-2 of Pai show an aluminum racquet with a main body 14; ripples 143 correspond to the recited ribs.

Regarding claim 6, Pai discloses forming ripples 143 by a rolling process. See paragraph [0021].

4. Claims 5, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pai as applied above.

Regarding claim 5, although Pai discloses a rolling process for forming the ribs, it would have been obvious to one of ordinary skill in the art to form them from a punching process since Pai also discloses that punching is another well-known technique in forming aluminum. See paragraph [0017].

Regarding claims 8 and 9, Pai indicates that the corrugated configuration of ripples 143 improve the strength of the aluminum racquet; Pai also notes that the ripples can be formed on only a segment of the frame. See paragraphs [0019] and [0020]. Discovering an optimum value for a result effective value has been held to be within the capabilities of the person of ordinary skill in the art. It would have been obvious to a person having ordinary skill in the racquet art, by routine experimentation, to provide the Pai racquet with ripples of varying depth in order to selectively strengthen specific areas of the racquet.
